OPS Innovation Lab

- Collaboration between Ontario Government, MaRS Discovery District & IT Industry
- Venue to test and validate the integration of emerging technologies as “green field” opportunities, or with legacy systems.
- Current participants include:
 - MaRS Discovery District
 - HP
 - Lenovo
 - Sun
 - Dell
 - Oracle
 - IBM
 - Microsoft
 - Nortel
 - Tandberg
- Negotiations currently underway with additional participants

IT Standards

- Subject of ITAC information session is summer of 2008
- Government of Ontario currently has 58 formal IT Standards (GO-ITS)
- There were 11 IT standards approved in 2008
- IT standards workplan for 2009:
 - 27 updates (5 major updates, 22 minor)
 - 5 significant standards under development, e.g., case management, business intelligence, data base, video equipment, wiring topology
 - Green IT standards to support Green IT Strategy

Industry Discovery Series

- Education seminars to improve ITAC/OSVA member's understanding of government's IT related processes in an open and casual environment
- Sessions to-date (ITAC) are:
 - May 2008: IT Standards
 - June 2008: IT Gating Process
 - November 2008: Privacy & Security Considerations in Applications Development
- Additional sessions are under consideration for 2009, and will be announced on the ITAC website.
